

Selection Criteria

Jiradett Kerdsri, Ph.D.

for

DEPARTMENT OF TREASURY AND FINANCE

December 8, 2022

Technical Capabilities

1. Advanced analytical skills with a demonstrated ability to identify trends and patterns and present data insights in clear and engaging ways.
2. A track record of delivering projects to time and budget, including procurement and contract management of external suppliers.
3. Sound organisational skills with the ability to effectively manage and develop a team, creating a positive and supportive team culture that fosters both individual and team accountability.
4. Public or private sector track record in managing complex programmes, projects and/or organisations, including leading and influencing multi-disciplinary teams, consultants and contractors to achieve corporate goals and project objectives.

I have experience as a data analytics leader at the Bank of Thailand including managing and delivering several data analytics projects for stakeholders. I have managed multi-disciplinary teams including data scientists, data engineers, and data analysts. The outcomes of the team are the financial insights presented to the executive members of the organization. As a deputy director, part of my responsibility is to manage the budget and procurement for the data management department.

Interpersonal capabilities

1. Flexibility and adaptability – demonstrated ability to plan and navigate a complex environment and work comfortably with ambiguity.
2. Innovation and continuous improvement – ability to integrate new ideas and concepts across diverse disciplines into new ways of thinking, working, or delivering solutions
3. Critical thinking and problem solving – objectively analyse and evaluate available data, points of view, needs of stakeholders and potential solutions before recommending relevant actions or decisions.
4. Interpersonal skills – Proven ability to build relationships and work productively with a diverse range of internal and external stakeholders at all organisational levels.
5. Communicate with impact – effectively utilise all communication mechanisms to present complex information in clear and engaging ways to a variety of stakeholders

I was a director at a research institute with an innovative and adaptive environment that encourage me to continuous improvement, especially in critical thinking and problem-solving. I have to be a mentor for researchers and we also collaborate on research projects which require communication and interpersonal skills.

Experience and qualifications

- Tertiary qualifications in economics, data, project management, government, or business.
- Working knowledge of major capital projects and how to measure their performance.
- Experience in asset or projects-specific policy development and the development of external consultant briefs.
- Sound judgment capability with the ability to work well under multiple directions and time pressures.

I have a Ph.D. in Engineering and Technology with more than ten years of data analytics experience. I have been at a manager and executive level for government organizations so I have experience with key performance indicators and policy development.
